EDUCATION

University of Waterloo

Honors Bachelor of Computer Science, Business Option, Co-op Program

Waterloo, ON

2007 – 2012

WORK EXPERIENCE

Meta Platforms Inc.

Technical Program Manager – Growth, Core Product

Seattle, WA

May 2021 – Present

- Leading the delivery of 4 concurrent programs in centralizing user settings across all Meta apps (Facebook, Instagram, Oculus, WhatsApp) and working with cross-functional teams (product, legal/privacy, engineering, data science, etc.) to launch globally to +2 billion users
- Created a new process for scaling the support of new settings to consolidate into the centralized settings experience
- Create team roadmaps, prioritize work, and lead delivery of components and frameworks for new design system focused on cross app products
- Drove adoption of new design system by showing the benefits and efficiencies to partner teams which drove usage from 0 to 70+ products in less than 2 years
- Drove the execution for launching the first 5 products to onboard to the design system
- Responsible for defining, maintaining, and improving the intake process for new product team engagement with the design system to support new interfaces and tech stacks (VR, Web, Native)
- Unified the capacity planning and road mapping process across all 5 teams to provide clear visibility for leadership on priorities and resource allocation
- Manage engineering team sprint planning for feature development and technical support for the design system

Amazon Inc.

Technical Program Manager – Customer Delivery Experience

Seattle, WA

Sept 2019 – May 2021

- Leading the delivery of a large-scale migration project of the most trafficked pages on Amazon's retail website
- Working with more than 10 external teams simultaneously to commit and implement feature upgrades and migration to customer facing delivery tracking pages
- Creating and managing a worldwide tax and consumer protection compliance project impacting customer facing pages on Amazon's retail website
- Creating the system design architecture for a new service and API that will show a customer's order total breakdown across all pages on the retail website
- Responsible for owning, maintaining and improving the delivery experience intake process which interfaces with over 100 teams across Amazon to allow for integration of features into customer-facing properties owned by our team including new products, features and marketplaces

Alex Marian

alex.v.marian@gmail.com | [linkedin.com/in/alexmarian](https://www.linkedin.com/in/alexmarian)

- Creating and maintaining the yearly and quarterly team plan for the Your Orders team to prioritize goals, plan resourcing needs and report updates to the organization leadership team
- Leading the sprint planning sessions for the Your Orders team and working with SDM's to prioritize, track and report on progress, velocity and effectiveness of team sprints
- Working with SDE's to capture team feedback and retrospectives on how to constantly improve efficiency, collaboration and visibility across the team
